

Getting Started with Outline Engine

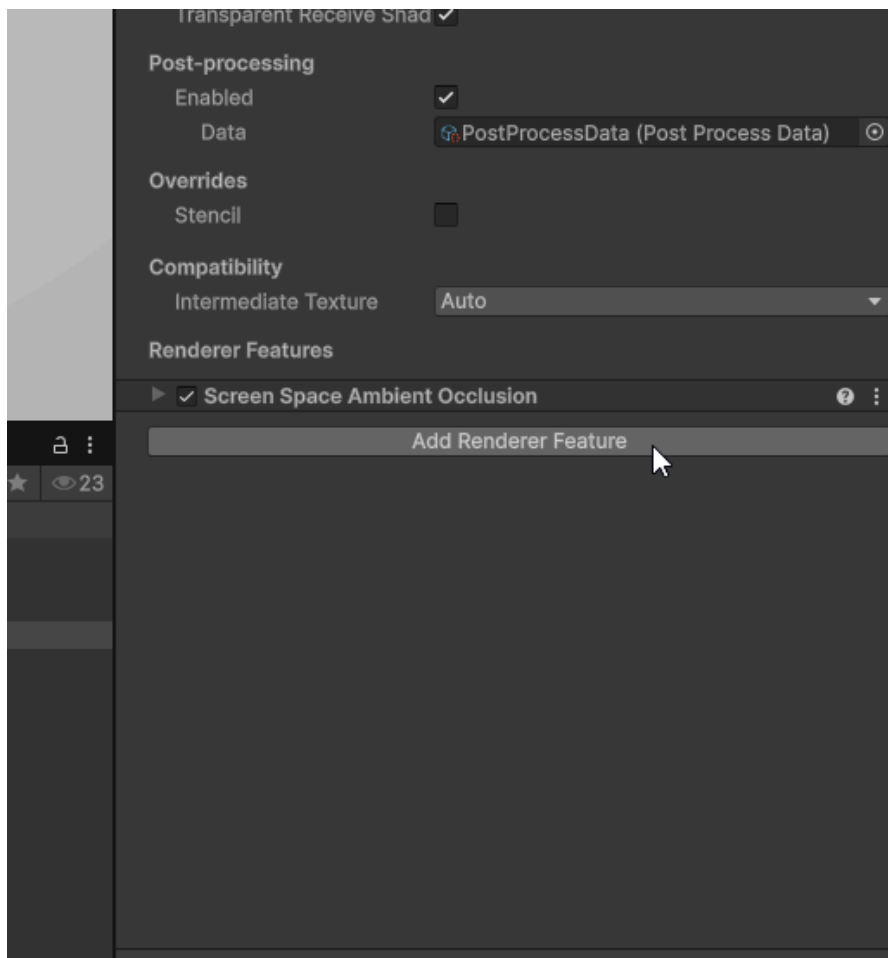

Adding a Renderer Feature

To use Outline Engine, add the Outline Engine renderer feature to your current renderer asset.

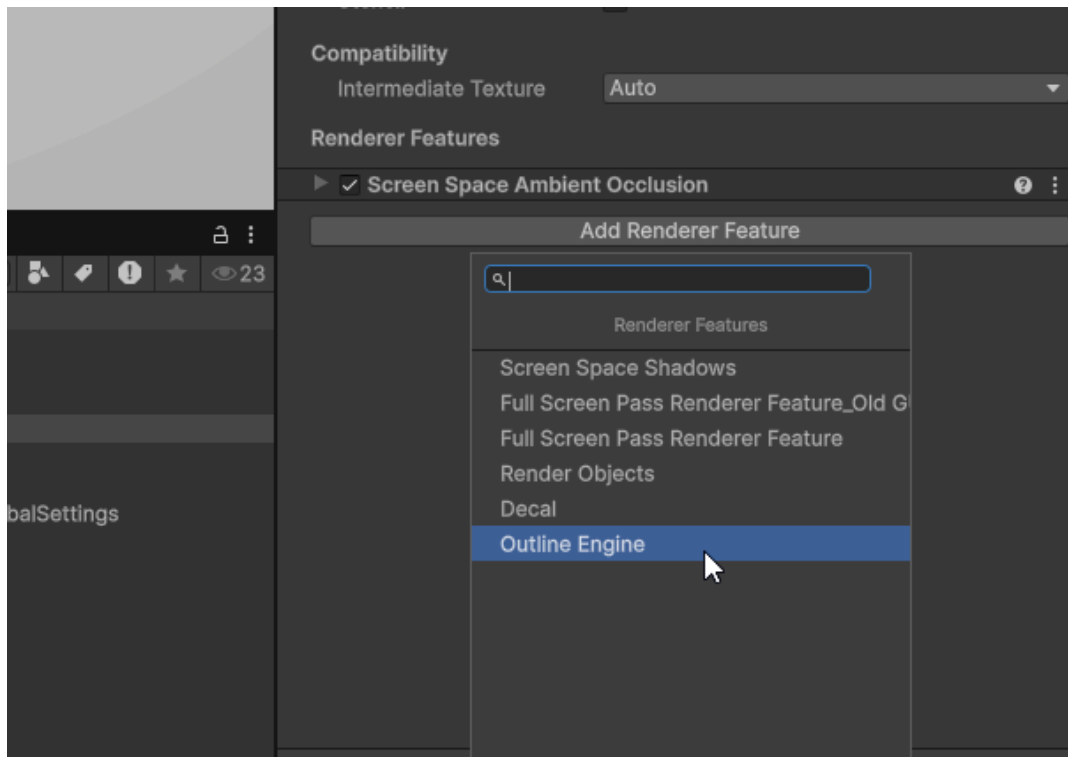

1. Select the currently used renderer asset.

2. Press *Add Renderer Feature*.

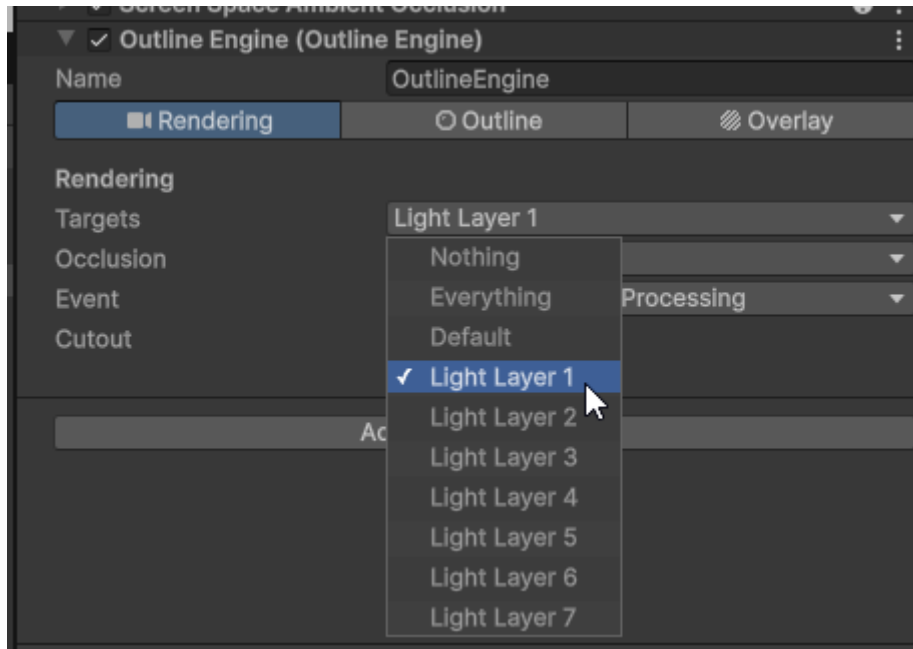

3. Select *Outline Engine*.

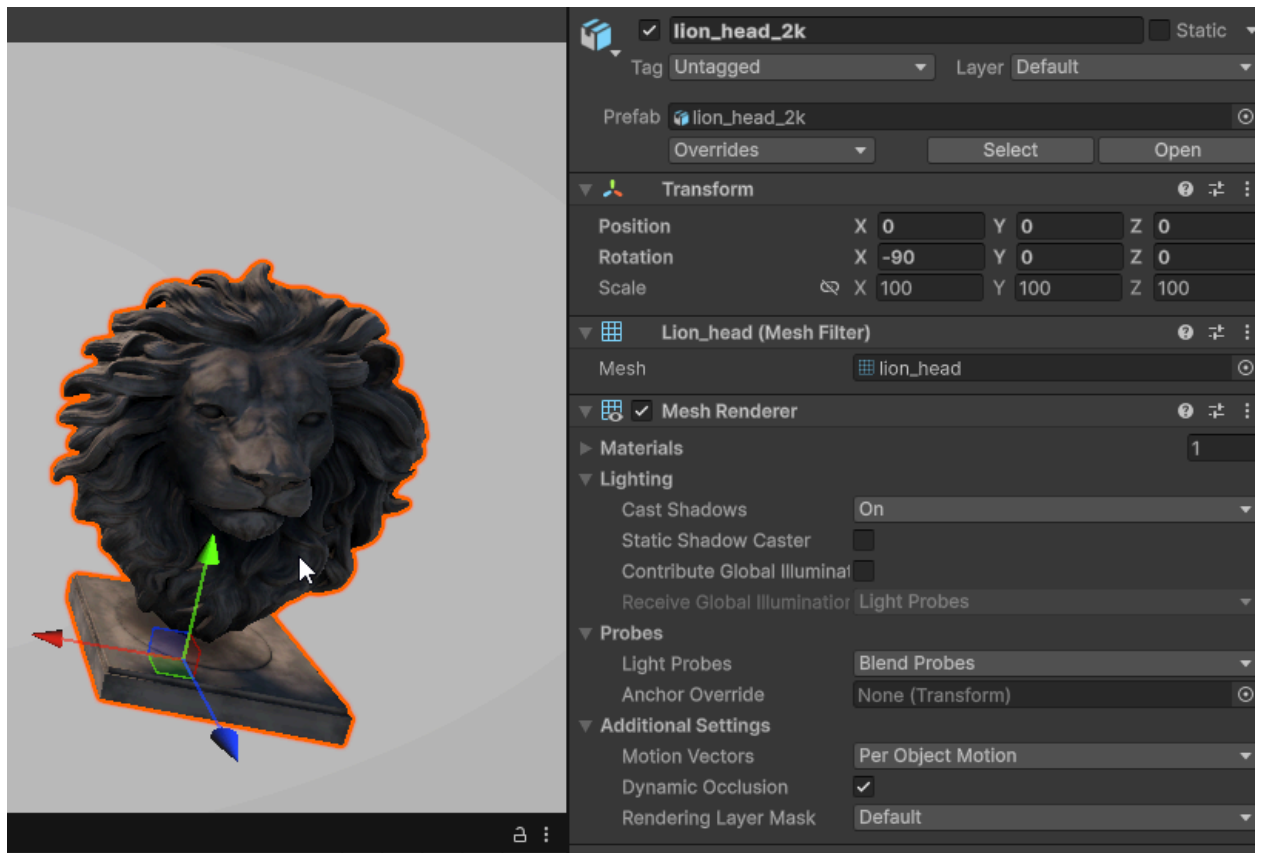

Working with Rendering Layers

To outline a specific object or group of objects, use the Targets parameter and rendering layers.

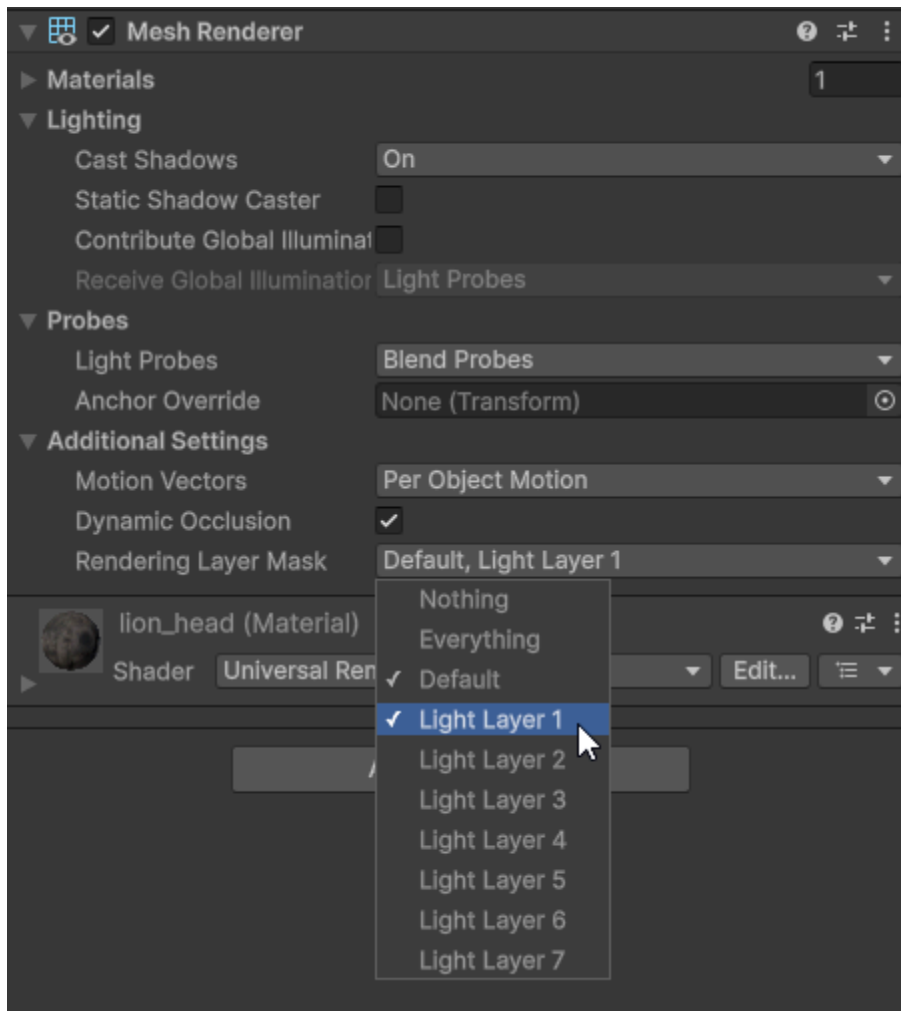

1. Set Targets to a new rendering layer

2. Select the objects to outline

3. Add the objects to the same rendering layer

To rename and add rendering layers, go to *Edit > Project Settings... > Tags and Layers*.
